REVIEW OF ENVIRONMENTAL PROTECTION AGENCY S (EPA) OPERABLE UNIT (OU) 1 EXTENSION REQUEST LETTER - RZH 009 94

On March 2 1994 EPA faxed the Department of Energy/Rocky Flats Office (DOE/RFO) a letter responding to DOEs request for an extension to the Interagency Agreement milestone dates for OU 1. The Environmental Engineering and Technology (EE&T) group of EG&G Rocky Flats. Inc. reviewed the EPA response and is concerned that EPA deleted several necessary steps required to prepare a professional defensible document. EE&T s concerns are listed below.

it is EG&G s internal policy that all primary documents undergo a quality assurance review before documents are issued to DOE EPA proposed to delete this step for Technical Memorandum 11 and for the Corrective Measures Study/Feasibility Study report. Thirty working days were deleted from the schedule for this process. This time should be added back into the schedule.

DOE's Headquarters Document Review Protocol was used in preparing the schedule This document specifies that schedules should reflect adequate time for DOE Headquarters to review draft and final versions of a document EPA deleted the second DOE review cycle

The dates for the Proposed Plan Responsiveness Summary and CAD/ROD should be target dates only unless early agreement can be reached on review periods and the public comment period. For instance will EPA and CDH reviews of the proposed plan and CAD/ROD be limited to 20 days? The public comment period to 30 days?
